Chenglong Fu

Assistant Professor, Department of Cybersecurity, UNC Charlotte
chenglong.fu@charlotte.edu | Google Scholar

Research Interests

My research focuses on IoT and cyber-physical systems security, AI security and privacy, and AI-assisted security analysis. I combine system analysis, formal methods, and experimental evaluation to study device behavior, adversarial risks, and verifiable automation. I also develop open-source infrastructure for auditable AI-assisted research and smart-home interoperability.

Education

Temple University Philadelphia, PA
Ph.D. in Computer and Information Sciences *Aug. 2016 – May. 2022*

- Supervised by Prof. Xiaojiang Du
- Dissertation Title: Semantics-aware Effective Security Solutions for Home Automation System

University of Science and Technology of China Hefei, China
Bachelor of Engineering in Information Security *Aug. 2011 – June. 2015*

Research & Work Experiences

Assistant Professor Aug 2022 – Present
University of North Carolina at Charlotte *Charlotte, NC*

Postdoc Research Fellow Jan. 2022 – Aug. 2022
University of South Carolina *Columbia, SC*

Research Assistant Sep. 2016 – December. 2021
Temple University *Philadelphia, PA*

Selected Open-Source Projects

RKA – Research Knowledge Agent

- An open-source knowledge system for long-running, AI-assisted research. Connects notes, experiments, decisions, and claims with supporting evidence to preserve research continuity and researcher control.
- github.com/rka-project/rka-core

EdgeLoom

- An open-source toolchain for smart-home edge drivers, including hidden-capability exposure, cross-platform translation, artifact validation, and reviewable audit records.
- github.com/edgeloom-oss/edgeloom

Funding and Grants

CCI Summer Education Project Award Summer 2026

- "Entry-Level Cybersecurity Course for All UNC Charlotte Majors." Awarded by the CCI Office of the Dean, UNC Charlotte; $7,000 in project support.

Lead PI - UNC Charlotte Core Facilities Program Sep 2024

- "Building Customizable Large Language Model Services for Education and Research", Granted by University of North Carolina at Charlotte, $250K. 2024-2026

CoPI - NC Research Opportunities Initiative June 2023

- "North Carolina Research Capacity Building for a Secure & Reliable Power Grid 2050", Granted by University of North Carolina System, $1.5M total project funding. 2023-2026

PI - UNCC Faculty Research Grants Program Jan 2024

- "Automated Auditing of Initial Coin Offerings", Granted by the University of North Carolina at Charlotte, $8K. 2024-2025

Teaching Experiences

ITIS 3200: Introduction to Security and Privacy Jan 2025 – May 2025

ITIS 4221/5221: Penetration Testing & Secure Programming Jan 2023 – Present

- Spring 2025 instructor evaluation: 4.0/5

ITSC 3146: Operating Systems & Computer Networks Jan 2023 – May 2023

- Instructor evaluation: 4.1/5

Professional Services

Program committees

- IEEE Symposium on Security and Privacy, 2027
- USENIX Security Symposium, 2027
- ACM Conference on Computer and Communications Security (CCS), 2025

University service

- University Research Council, UNC Charlotte, 2026–2028 term

Conference organization

- IEEE/IFIP International Conference on Dependable Systems and Networks 2026, Poster Chair
- IEEE/ACM International Symposium on Quality of Service 2023, Publicity Chair
- IEEE International Conference on Cloud Networking 2023, Publicity Chair
- IEEE International Conference on Intelligence and Security Informatics 2023, Finance Chair

Journal and conference reviewing

- IEEE Transactions on Information Forensics and Security, Reviewer
- IEEE Transactions on Pattern Analysis and Machine Intelligence, Reviewer
- IEEE Transactions on Mobile Computing, Reviewer
- IEEE International Conference on Computer Communications 2021-2023, Reviewer

Awards and Honors

Best Paper Award, RAID 2026 *2026*

- "Effective Handling of Erroneous Executions of Automation Rules on Multiple Platform Smart Home IoT Systems," with ZhuoYi Shi, Xiaojiang Du, and Rong Xu.

Best Paper Award (Security Track), Inscrypt 2026 *2026*

- "Does Efficiency Leak? Auditing the Privacy of Compressed and Stale Updates in Federated Intrusion Detection for IoT," with Xuening Xu and John Du.

CCI Summer Education Project Award *2026*

- Support for developing an entry-level cybersecurity course for students across all UNC Charlotte majors.

Scott Hibbs Future of Computing Award *April 2021*

- Each year, only one student is selected from all the graduate and undergraduate students (over 1,000 students) in the CIS Department at Temple University

Outstanding Undergraduate Scholarship *Sep 2014*

- 10% among all undergraduates, granted by University of Science & Technology of China

Seagate Scholarship *Dec 2013*

- 5% among all undergraduates, Granted by Seagate Technology co., LTD

Outstanding College graduates in Provincial Scale *June 2015*

- 1 among all undergraduates in the department of Information Security, Granted by Department of Education of Anhui Province
